SKILLS

Web

JavaScript, TypeScript, React,
Next.js, HTML/CSS, Tailwind,
Bootstrap

Mobile

Swift, SwiftUI, watchOS,
HealthKit, WidgetKit, Live
Activities

Backend & data

Node.js, Express, PostgreSQL,
SQL, MongoDB, Supabase,
Firebase, REST APIs

Platforms

Stripe, Cloudflare Workers,
Vercel, GitHub Actions, CI/CD

Also

Godot/GDScript, C#, Python,
Figma, Agile/SCRUM, AI
integration (OpenAI API, Claude)

EDUCATION

Associate's Degree, Computer Science

Rowan College of South Jersey
(RCSJ)

Web Development Certificate

Miles Technologies Boot Camp ·
2021

Database Development Certificate

Miles Technologies Boot Camp ·
2021

High School Diploma

Kingsway Regional High School ·
2019

PROFILE

Software developer with 5+ years shipping production web and mobile software. At Foley Prep I build the platform students use every day for SAT prep — digital SAT test software, an AI study assistant and Stripe payments. Outside work I co-founded **Mile A Day**, a fitness app live on the App Store with an iOS + Apple Watch client, a TypeScript/PostgreSQL backend and a Next.js site, and I build sites for local businesses.

EXPERIENCE

Software Developer

Mar 2023 - Present

Foley Prep · Haddonfield, NJ

- Lead development of foleyprep.com, the platform students and tutors use daily for SAT prep, tutoring and AI study tools.
- Built the digital SAT test-taking software: timed sections, question navigation, answer review and score-report dashboards.
- Shipped an AI study assistant on the ChatGPT API that gives students on-demand explanations and strategies.
- Built a Stripe payments system covering subscriptions, one-time purchases and billing management.
- Co-created "Bulb", a gamified tutoring app, and built the marketing site for Scorgi, Foley Prep's SAT platform for tutors.

Integrations Developer

Mar 2021 - Jun 2022

XGen AI · Clearwater, FL (Remote)

- Built and deployed custom JavaScript integrations of personalized "Recommended for You" experiences into e-commerce brands' storefronts.
- Owned the rulesets and page triggers controlling when personalized content appeared, directly affecting client conversion.
- Debugged cross-browser issues across dozens of client sites.

Programming Intern

Jul 2020 - Mar 2021

USLI · Wayne, PA (Remote)

- Shipped C#, SQL and JavaScript changes to production alongside senior developers in a SCRUM/Agile team.

PROJECTS

Mile A Day [Live](#) · [App Store](#) — Co-founder & developer of a social fitness app: daily mile streaks, competitions, live group walks and a social feed. [SwiftUI](#) · [watchOS](#) · [HealthKit](#) · [TypeScript](#) · [Express](#) · [PostgreSQL](#) · [Next.js](#)

Fetch [Playable on robwiscount.org](#) — 3D local-multiplayer party game with CPU opponents, 8 arenas and power-ups, exported to the web. [Godot](#) · [GDScript](#)

Client sites — Trouble Brewing coffee house (React site + click-to-edit CMS on Supabase), Pressed by J&H juice shop (Stripe checkout with pickup/delivery), Traveling Tastebuds food creator (interactive food map + admin). [React](#) · [Supabase](#) · [Stripe](#) · [Express](#) · [MongoDB](#)

LeBronify [Live](#) — Spotify-style parody music player on web and iOS with Dynamic Island, CarPlay and widgets. [SwiftUI](#) · [JavaScript](#)

Dawg House Duel [Live](#) — Game-show picture duel with phone pairing over a Cloudflare Worker and a daily challenge. [JavaScript](#) · [Cloudflare Workers](#)

Unused CSS Detector [VS Code Marketplace](#) — Published extension that flags dead CSS by tracing HTML links and JavaScript imports. [TypeScript](#) · [VS Code API](#)
